

2005 Belgium Training Information

INFORMATION BUILDERS' TRAINING SERVICE

organizes numerous courses designed to provide the skills, techniques and support you need to maximize your investment. Every Information Builders' instructor is a professional consultant who has years of real world experience using our technologies to solve business problems. Through these courses, you'll get a better understanding of our products' underlying technologies. You will gain practical knowledge and fluency in working with our applications and tools and you will learn invaluable tips and techniques for getting the most out of our software and ensuring smooth, trouble-free operations.

Following is a list of courses to help you design a training program suited to your particular needs and you will find all course descriptions on: www.informationbuilders.be/support/education.html
